FTTH
FIBER TO THE HOME
COUNCIL

Who we are

- **Independent telecoms from across North America** that are “future-proofing” their networks by upgrading to FTTH.
- **Competitive broadband providers** looking to take that next step to all-fiber connectivity.
- A wide variety of **FTTH equipment manufacturers** and other broadband solutions providers showcasing their latest products.
- **Engineering, outside plant, consulting and construction firms** that work with telecom service providers to design and deploy North America’s next generation networks.
- **Municipalities and electric utilities** that operate all-fiber networks as a way of enhancing prospects for local economic development.
- **Educational institutions, students and individuals** interested in learning more about all-fiber networks and their role in a community’s economic growth and competitiveness.

Our Areas of Focus

- Building a legislative and regulatory framework for advancing FTTH deployments.
- Emerging optical access technologies and FTTH industry trends.
- All-fiber network design, operations and optimization.
- Fiber to the home business planning and marketing strategies.
- “Smart Grid” and green technology evolution.
- High-bandwidth consumer applications, content and in-home networking.

Founded in 2001, the Fiber-to-the-Home (FTTH) Council is a non-profit association consisting of companies and organizations that deliver video, Internet, voice services and emerging applications over fiber optic connections - as well as those involved in planning, supplying and building FTTH networks. The Council works to create a

cohesive forum to share knowledge and build industry consensus on key issues surrounding fiber to the home.

Over the past decade, the FTTH Council has become North America's premier community of experts and most aggressive advocate for the expansion of next-

generation broadband networks. With a growing membership of more than 250 companies and organizations, the Council is the place where FTTH equipment manufacturers, builders of networks and forward-thinking telecommunications companies of all sizes join together to learn from each other and find ways to cooperatively enhance their business success.

Where all aspects of the fiber to the home industry join together to share knowledge, educate the public and promote the expansion of next-generation networks.

Our Mission:

To educate the public and government officials about FTTH solutions and to promote and accelerate deployment of fiber to the home networks and the quality of life enhancements they make possible.

Sharing industry knowledge

- An **online library of FTTH information on deployments and best practices** – white papers, market studies and presentations **available to Council members only**.
- **Webinars**, some of them for members only, offering education, case studies, regulatory information, and best practices on a wide range of FTTH topics.

Promoting industry standards

- A **Fiber-Connected Home Certification program** verifying use of 100% optical fiber all the way to the subscriber premises – and a decal to proudly affix to each subscriber's terminal.
- A **Certified Fiber to the Home Professional (CFHP) program**, examination and registry, offering the opportunity for you and your employees to become officially certified as having the technical and industry knowledge to manage FTTH systems.

Assuring a healthy regulatory climate for FTTH deployment

- The opportunity to be part of a **collective voice at national and state legislative and regulatory levels** to remove barriers and promote policies that ensure successful FTTH market entry.

- A members-only group on the professional networking web platform **LinkedIn**, through which members share information and operational solutions to engineering or design challenges, and stay current on Council activities and industry news/events.

LinkedIn

Serving as a forum for business development & professional networking

- An **annual Conference & Expo** that attracts 2000 attendees and includes dozens of learning sessions, panel discussions, case studies and the most comprehensive trade show in the industry. Council members benefit from **preferred rates on conference admission passes and on exhibition space.**
- **Member meetings** held three times a year at various locations around the country, accompanied by one-day best practices and “hot topics” workshops aimed at providing shared knowledge and networking opportunities to telecom service providers. Council members receive substantial admission discounts and exclusive opportunities to exhibit their products and services at these events.

Isn't it time you enjoyed the benefits of FTTH Council membership?

The Council offers several membership categories, with dues starting at only \$395/year. For more information, please consult the membership section of the FTTH Council website, www.ftthcouncil.org, or email us at secretariat@ftthcouncil.org.

“As FTTH networks continue to expand, our efforts are more focused than ever on helping companies find success and profitability in this exciting industry. Share in our knowledge and experience as we work to leverage all-fiber connectivity into life-changing advancements in communications, entertainment, education and health care.”

*Daniel O'Connell
President, FTTH Council North America*
